## RE: Letter of Recommendation for Future Foundations

To Whom It May Concern,

I am the AimHigher co-ordinator at Capital City Academy and the school worked with Future Foundations in September 2010 on a Residential visit to Cambridge University for 34 Year 9 students.

Capital City Academy is in an area of considerable social deprivation and the students come from a wide range of backgrounds including 50% who do not have English as a first language. Despite these challenges Capital City Academy manages to give pupils belief in themselves and high hopes for the future.

The professionalism of Future Foundations was excellent throughout the project. From the initial planning of the project through to delivering the programme at Cambridge they communicated affectively and worked efficiently and enthusiastically.

Their focus was always on delivering the best possible training and experience for the students and they worked hard at involving all the students and challenging them to succeed. During the programme at Cambridge students took part in debates, public speaking and other various workshops which encouraged them to work as a team.

All of the students came away from the residential having had a very positive experience which had raised their aspirations for the future.

I highly recommend Future Foundations and hope to work with them again in the Future.

Yours Sincerely,

Chris Phillips  
AimHigher co-ordinator
